

Introducing our Bay Day Booths:

Meet our Weekly Water Wellness Team & other Bay initiatives.

Stabilizing the planet through eco-restoration initiatives YOU can do on your own.

Learn about Sodus Bay Junior Sailing youth & community boating programs.

Sail with us on the restored, historic *Schooner Lotus* designed by naval architect William Hand Jr. in 1916.

We teach boating safety & can also help you get your Captain license.

Schedule your boating safety course today!

Learn how to get involved in conservation.

History of Civil Engineering Projects on the Great Lakes

Learn how SBIA is managing invasive species & weeds on the East side of the Bay.

Enjoy historical enactments from the Sodus Bay Historical Society.

Why Nature is for everyone.

Existing with Wildlife.

Learn about the New York Water Resources Institute's Aquatic Invasive Species Research.

How to live resiliently on the shores of Lake Ontario.

Town of Huron booth on programs to support Bay health.

Underwater lake exploration and the Lake Ontario National Marine Sanctuary.

Kristen Moore of Moore Dirty Boots brings you *Plants for Pollinators!*

Learn more about the work of the public advisory group (PAG) to the IJC's Lake Ontario River Board, responsible for lake level regulation.

Learn more about living a plastic-free lifestyle through the work of the new University of Rochester partnership with the Rochester Institute of Technology - creating the Lake Ontario Center for Microplastics in a Changing Environment.

1. Importance of regional wetlands
2. How you can make your property more resilient to coastal storms and higher water levels.
3. The history of overfishing in Lake Ontario and how Sea Grant revived our regional fisheries.

Water is fun!

Join us with hands-on exhibits to learn about watersheds and what you can do to protect them. Plus, are you considering a career in environmental conservation? We'd love to talk to you.

Learn about our *Amped Program* — free energy-advising services. Create local climate action through our *Color Your Community Green network*. Our message: We can address multiple challenges while taking action on climate change!
